By Lawrence M. Krauss : Hiding in the Mirror: The Quest for Alternate Realities, from Plato to String Theory (by way of Alice in Wonderland, Einstein, and The Twilight Zone) Hiding in the Mirror: The Quest for Alternate Realities, from Plato to String Theory (by way of Alice in Wonderland, Einstein, and The Twilight Zone):

3 of 3 review helpful Not a light read but amazingly fascinating By innovate risk For those of us not physicists or mathematicians the concepts in this book are challenging but also enlightening To understand the very nature of the universe and everything in between is the very foundation of a species that explores its own existence and truths I thoroughly enjoyed reading this book albeit at times the challenge An exploration of mankind's fascination with worlds beyond our own by the bestselling author of The Physics of Star Trek Lawrence Krauss an international leader in physics and cosmology examines our long and ardent romance with parallel universes veiled dimensions and regions of being that may extend tantalizingly beyond the limits of our perception Krauss examines popular culture's current embrace and frequent misunderstanding of such topics From Publishers Weekly There are few scientific ideas as captivating as the notion that our universe might have other dimensions than the three plus time that we experience Physicist Krauss offers an erudite and well crafted overview of the role multiple dimensions
