11 of 12 review helpful Many fascinating ideas in ethics and personhood By Patrick McCuller I got this book hoping for insights on temporal metaphysics and found a cornucopia of ideas analyses and gedankenexperiments on the nature of personhood The moral calculus of time and self is neatly laid out for exploration do you have obligations to your past self A class of problems is deeply probed whether and how you evaluate Challenging with several powerful arguments some of our deepest beliefs about rationality morality and personal identity Derek Parfit claims that we have a false view about our own nature It is often rational to act against our own best interests he argues and most of us have moral views that are self defeating We often act wrongly although we know there will be no one with serious grounds for complaint and when we consider future generations it is very hard to Very few works in the subject can compare with Parfit's in scope fertility imaginative resource and cogency of reasoning P F Strawson The New York of Books Complex brilliant and entertaining This book is chock full of impressive arguments
