REVIEW and summary I was enthralled by the ideas presented in this 1968 book especially by their relationship to the subsequent work of Ernest Becker in his 1973 Pulitzer Prize winning work The Denial of Death Koestler s explanation and reformulation of evolution as the manifestation of hierarchical principles in phyl Koestler examines the notion that the parts of the human brain structure which account for reason and emotion are not fully coordinated This kind of deficiency may explain the paranoia violence and insanity that are central parts of human history according to Koestler s challenging analysis of the human predicament
