11 of 11 review helpful An eye opening read By H Hoffman As an educated rational person I was quite skeptical of the consciousness creates reality concept This book has given me a lot to think about I will definitely read more on the idea This was a great starting point and a worthwhile read My thanks to the author for courageously presenting his worldview to what must be an overwhelming materialist audience 15 o Why does the universe exist and what are you supposed to do in it This question has been addressed by religions since time immemorial but popular answers often fail to account for obvious aspects of reality Indeed if God knows everything why do we need to learn through pain and suffering If God is omnipotent why are we needed to do good If the universe is fundamentally good why are wars crime and injustice all around us In modern society orthodox science tak About the Author Dr Bernardo Kastrup has been a scientist in some of the world s foremost scientific laboratories A successful entrepreneur he is currently an executive in an influential technology company
