2 of 2 review helpful the truth about the US and your personhood By Mugisa Rathael Fambro This is yet another very good book by this author It thoroughly explains all forms of law hierarchially It s amazing that the government basically has lied about so many things to the common masses We have been brainwashed through our educational social political and religious institutions to believe so many false things It This book has been written from the point of view of the Black people of the Western World who are striving toward living a life of freedom and true Sovereignty The ideas and concepts presented are not new They have been a part of our commercial and admiralty system going back hundreds of years Here Paul Simons concludes the MMSN series of books which are written to inspire uplift empower and spiritually strengthen anyone who is a true seeker of Right Knowledge
